

‘BUILDING SUSTAINABLE BUSINESS COMMUNITIES’

Release date: 1/6/2015

Update for the Emerald Business Community

Free Networking Event in Emerald

The Market and Resilience, Operations at Gregory Crinum Mine and a BMA Local Buying Program are the key topics at this year’s Building Sustainable Business Communities Networking Event in Emerald. The Local Buying Community Foundation’s (LBCF) Networking Event will be held on Thursday 11 June at the Mayfair Ridge Tavern,

“It is very exciting for businesses in the Central Highlands region to be able to get a firsthand report from BMA representatives of the current BMA activities and possible business engagement opportunities” Chair of the LBCF Advisory Committee, Jessica Simpson stated.

Attendance is free and offers a fantastic opportunity for local business, industry and other stakeholders to meet and network. There is no cost to attend the event but RSVP’s are vital as numbers are limited. The event is funded by the Local Buying Community Foundation.

Preceding the networking event are a series of subsidised workshops with the additional option of one on one mentoring sessions with the presenters of the “You’ve won the Tender – Now What” - Understanding Project Management.

The workshop is presented by Bronwyn Reid (Mining for Business), Steve Knight (Department of State Development) and BMA. Workshop attendees will learn how to manage projects to ensure a successful project delivery and profitable result from every project.

Wix – Website Development beginner and advanced workshops will be followed by hands on tutorial session. These events are is being run on 11 & 12 June by Melissa Westcott (TM3 Training). Wix has something for everyone and allows users to build an amazing online presence without needing to use coding for the website creation.

The LBCF is an initiative of the BMA Local Buying Program (BLBP) and aims to build sustainable business communities and sustainable futures. Since inception in July 2012 the foundation has received over \$590,000 in funding through the BLBP and has funded 37 projects.
